

```
● PS C:\Users\milos\Desktop\MiloszKryzia_project2> java -jar Task1.jar
Enter page size: 2

Enter a virtual address: 10500

The address 10500 contains: page number = 5 offset = 260
```

```
● PS C:\Users\milos\Desktop\MiloszKryzia_project2> java -jar Task2.jar
Enter initial head position: 1000

Enter previous head position: 1020

fcfs
A. Random:
Head movement count: 1000
Direction change count: 679

B. From input:
Head movement count: 5
Direction change count: 4

sstf
A. Random:
Head movement count: 903
Direction change count: 3

B. From input:
Head movement count: 4
Direction change count: 1

scan
A. Random:
Head movement count: 919
Direction change count: 1

B. From input:
Head movement count: 5
Direction change count: 1

cscan
A. Random:
Head movement count: 900
Direction change count: 0

B. From input:
Head movement count: 5
Direction change count: 0
```

```
PS C:\Users\milos\Desktop\MiloszKryzia_project2> java -jar Task3.jar
Enter a logical block number:
1041
Enter HD number of cylinders:
1000
Enter HD number of tracks:
20
Enter HD number of sectors:
63
The logical block number 1041 is located at < 0 , 16 , 33 >
```
